

GERIATRIC DEPRESSION SCALE (SHORT VERSION)

Name: _____
Date of Assessment: _____ Completed By: _____

Jerome A Yesavage

Geriatric Depression Scale

Psychopharmacology Bulletin (1988) 24:4;709-711

Instructions:

Each answer counts one point.

Total score greater than five indicates probably depression.

Issues:

The GDS is a screening tool and not a diagnosis. Where a score of more than five is indicated, a more thorough clinical investigation should be undertaken.

Feher et al.³⁷ have concluded that the GDS is a generally valid measure of the mild-to moderate depressive symptoms in Alzheimer patients with mild-to moderate dementia.

The right hand column shows test answers which are positive for depression
